

DATE... 11-4-23

EXP. No. 3

- ⇒ Create a bot in which you have to name the student & his/her marks in three subject. Display complete information of student in message box.
- First of all we go to the sequence & go to assign & drag it.
 - Then set the variable with the help of control & is in assign & give the name & marks in integer datatype.
 - Then, we also write message box which tells us about marks with the help of toString.
