2) Working with message box and wirte line.

→ message box

• First of all we go to the uipath studio, then we go to the process option and a pop up will come. We will name the process.

• Then we go to the new option and click the sequence and name it.

• from the activities, search the message box and drag it on the sequence.

• The message box output will run on the main desktop.

→ <u>write line</u>

• First of all open the UiPath studio, then we go to the process option a pop out will come and name the process.

• Then we go to the new option, click the sequence and name it.

• From the activities, search the write line and drag it on the sequence.

• The output of write line comes in output panel of UiPath studio.
